

To whom it may concern

Johannesburg, 18/06/2012

**Letter of recommendation: Amazing Transport**

Amazing Transport was contracted to move approximately 500 people from Boksburg to Greenstone in April 2012.

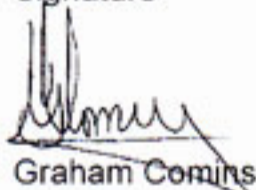

They met all the promised deadlines, from training, delivering of boxes to timing of moving equipment and documentation. Their system was simple and effective and worked faultlessly. Their management and supervisors were directly involved and on-site at all times and ensure that the process went unhindered.

The key differentiator came when the contractor responsible for moving and re-installing the high-density filing units was unable to perform under their contract and with only a few days notice, Amazing Transport, without hesitation, brought in additional teams and moved the remaining 36 units.

Amazing Transport was one of the key success factors to the company moving 500 people including the entire group IT infrastructure, with only two days of effective down-time. If Bateman ever moves again we will not hesitate to appoint Amazing Transport as our move contractors.

Yours sincerely/faithfully
